Name *

SHAIKH TAUSEEF MUSHTAQUE ALI

Roll No. *

18CO63

1) Assembler is a system software which converts _____ code into _____ code. *   2 points

○ High level language , executable

⦿ Assembly language , machine readable

○ Low level language , binary

2) System software's works as communicator between Application software's and driver software's *   2 points

◯ True

◉ False

3) It is responsibility of _____ software to load machine code into   2 points
memory for execution. *

◯ Linker

◉ Loader

◯ Compiler

◯ Assembler

4) Lexical analyzer is a term related to _____ *   2 points

◯ Linker

◯ Loader

◉ Compiler

◯ Assembler

5) _____ analyzer is a the stage in compiler which checks grammer of   2 points
programming language i.e. it checks whether expressions in source
program are symantically correct or not. *

○ Lexical analyzer

◉ Syntax analyzer

○ Intermidiate code generator

○ code optimizer

6) _____ is a system software which combines one or more codes *   2 points

○ Lexical analyzer

◉ Linker

○ Intermidiate code generator

○ Compiler

7) Pass structure of a assembler is to scan entire assembly language   2 points
program once to update location counter *

◉ True

○ False

8) Compiler converts a high level language program into low level language   1 point
program *

◉ True

○ False
